Helping You Sift CV's & Resumes
& Match Candidates.

When you're screening job applicants, do you spend as long looking at the last CV as you did the first?

How long do you spend on average screening applicants?

Why not let technology and AI do the hard work for you?

WHAT CV MATCH DOES FOR YOU

CV Match is an AI candidate screening tool to help busy hiring managers quickly and easily sift through CV's to identify the candidates that match your job description and key skills criteria the best.

WHY IS IT IMPORTANT?

Recruitment is a vital part of the job for every manager looking to build their team and their business to the next level. But often we can get bogged down in the recruitment admin when perhaps we should be focusing our time more effectively on the potential candidates that are worth investing our time in.
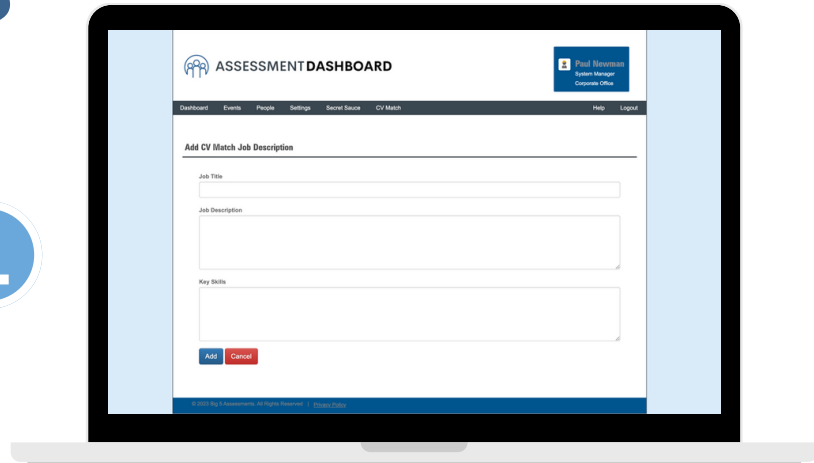

TECHNOLOGY AND AI DOES THE HARD WORK FOR YOU SO YOUR ENERGY IS SPENT ON THE BEST

How it works

UPLOAD YOUR JOB DESCRIPTION

Simply cut and paste your job description and list out the key skills that you are looking for in your ideal candidates
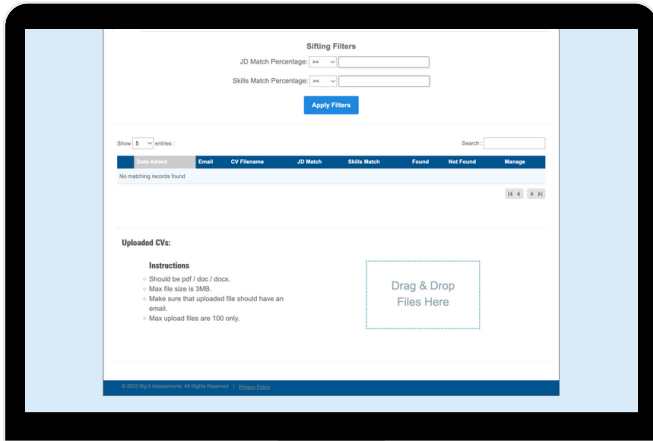

1

UPLOAD CVS

Upload all the CV's & Resumes you have in to the platform and we'll scan each with our AI to identify how well the CV matches the Job Description and find which key skills have been found and which ones have not been found.
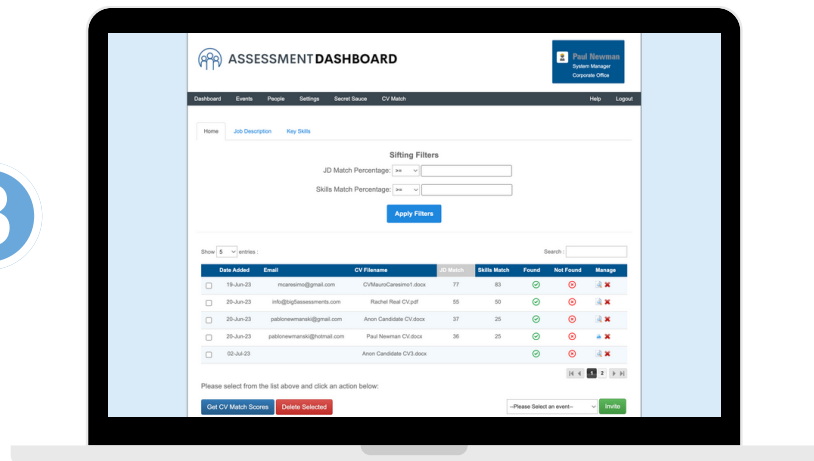

2

RANK YOUR CANDIDATES

With a Job Description Match Score and a Key Skills Score, you can then filter and rank your candidates and invite the best candidates directly into your assessment process.

Don't try to find the needle in the haystack...

PUT THE WHOLE
HAYSTACK
THROUGH.

Often, recruitment campaigns can be like trying to find the needle in a haystack.

Instead, use technology & AI to do all the hard work of sifting and screening for you, so that you only spend time and energy with the candidates that match your job descriptions and skills requirements.

A new approach to help you:

- Save hours finding the right A-Players with the skills and experience for your business
- Compare every applicant to your Job Description and Key Skills Criteria
- Focus your time on the best candidates
- Objectively identify your next hires based on CV Matching against your requirements
